and
PRIVACY

May 20-23

IEEE Symposium on Security and Privacy

The 2012 symposium will mark the 33rd annual meeting of this flagship conference. Since 1980, the IEEE Symposium on Security and Privacy has been the premier forum for presenting developments in computer security and electronic privacy, and for bringing together researchers and practitioners in the field.

To allow space for an increasing number of attendees, we are moving to a new venue. The 2012 symposium will be held at the Westin St. Francis, at Union Square in San Francisco, CA.

Registration opens in March 2012.

May 24-25

IEEE CS Security and Privacy Workshops

In order to further expand the opportunities for scientific exchanges, we created a new venue within the IEEE CS Technical Committee on Security and Privacy called Security and Privacy Workshops (SPW). Each workshop covers a specific aspect of security and privacy in more detail, making it easy for the participants to attend the symposium and a specialized workshop in the same week and location.

The 2012 workshops are:

- **W2SP:** Web 2.0 Security and Privacy
- **MoST:** Mobile Security Technologies
- **WRIT:** Workshop on Research for Insider Threat
- **WSCS:** Workshop on Semantic Computing and Security
- **TrustED:** Workshop on Special Aspects of Cyber Physical Systems: Trustworthy Embedded Systems

Sponsored by the IEEE Computer Society Technical Committee on Security and Privacy in cooperation with the International Association for Cryptologic Research (IACR).
