May 19–22

IEEE Symposium on Security and Privacy

The 2013 symposium will mark the 34th annual meeting of this flagship conference. Since 1980, the IEEE Symposium on Security and Privacy has been the premier forum for presenting developments in computer security and electronic privacy, and for bringing together researchers and practitioners in the field.

The 2013 symposium will again be held at the Westin St. Francis, at Union Square in San Francisco, California.

Registration opens in March 2013.

May 23–24

IEEE CS Security and Privacy Workshops

In order to further expand the opportunities for scientific exchanges, we created a new venue within the IEEE CS Technical Committee on Security and Privacy called Security and Privacy Workshops (SPW). Each workshop covers a specific aspect of security and privacy in more detail, making it easy for the participants to attend the symposium and a specialized workshop in the same week and location.

The 2013 workshops are:

CREDS: Cyber-security Research Ethics Dialog & Strategy

DUMA: 4th International Workshop on Data Usage Management

IWCC: International Workshop on Cyber Crime

MoST: Mobile Security Technologies

WRIT: 2nd Workshop on Research for Insider Threat

W2SP: Web 2.0 Security and Privacy

www.ieee-security.org/TC/SPW2013

Sponsored by the IEEE Computer Society Technical Committee on Security and Privacy in cooperation with the International Association for Cryptologic Research (IACR).
