

Birds of a Feather (BoF) Session

Wednesday, May 20

12:00 – 12:40pm

CHALLENGE: Cybersecurity experimentation tends to be ad hoc and lacks sharing and use of repeatable, reproducible, and reusable experiment artifacts

APPROACH: We are working with the community to create a collaborative platform that lowers the barrier to sharing by aiding researchers in packaging, importing, locating, understanding, and reusing cybersecurity experiment artifacts

WHAT YOU CAN DO: We invite all researchers to join the SEARCCH BoF session, where we will introduce SEARCCH and elicit open comments and feedback to form requirements that will make the SEARCCH hub an invaluable community resource
